

POLICY & CLAIMS ANALYTICS

Executive Dashboard Report

A 360° view of policy performance, claims liability, and payment channel efficiency across a 5,000-policyholder portfolio.

Executive Summary & Overview

Insurance organizations face challenges with policy attrition, high payment failure rates, and claims liability management. This project provides a 360-degree executive view of insurance operations to track gross written premiums, active policy retention, claim settlement performance, and payment channel efficiency.

Comprehensive portfolio health review across 5,000 policyholders, revenue distribution, and strategic intervention opportunities.

This analysis covers:

1

Payment Method Distribution

Cash, bank transfer, and credit card share of collected premium

2

Policy Status Breakdown

Active, lapsed, and terminated policy composition

3

Key Performance Indicators

Premium, coverage, claims, and risk across the portfolio

Problem Statement

Policy Attrition Crisis

Only **33.6% (1,682)** of policies are currently active. A staggering **66.4%** have ended prematurely due to terminations (33.6%) or lapses (32.8%), destroying recurring premium value.

Payment Failure Shortfall

Nearly half of all attempted payment transactions (**49.68% / 2,484 payments**) failed, resulting in a **\$1.95M uncollected shortfall** between attempted written premium and actual cash collected.

Key Portfolio Metrics

\$5.26M

Total Premium

Total approved claims stand at **\$85.80 Million** across 1,712 approved cases, maintaining a core operational payout ratio while managing active claim reserves.

The total active portfolio spans **5,000 policyholders** with **\$1.27 Billion** in aggregate liability coverage (average \$254.5K per policy).

5K

Total Policies

\$1.27bn

Total Coverage

251.4M

Total Claim Amount

50.38

Avg Risk Score

Premium Revenue by Product Type

Premium generation is exceptionally balanced across product lines. **Health leads revenue with \$1.363M (1,316 policies)**, followed closely by Life Insurance (\$1.339M).

Payment Method & Revenue Impact

*Payment processing is evenly split, but **49.68% of overall transaction attempts fail**. Shifting collections toward digital auto-debit will significantly reduce payment failures.*

Yearly Premium Trend

Annual premium maintained consistency between \$510K–\$562K from 2015 to 2023, peaking in 2022 (\$562.4K) before recent reporting contraction in 2024 (\$475.5K).

Strategic Action Plan

1

Automated Billing Reminders

Deploy automated SMS/Email billing alerts 7 days prior to due dates to tackle the 49.7% payment failure rate and prevent accidental lapses.

2

Auto-Debit Incentive

Offer a 3–5% renewal discount for policyholders enrolling in automatic bank/credit card debits to stabilize recurring premium collections.

3

Targeted Renewal Intervention

Assign dedicated retention agents to policyholders with low risk scores (<30) 60 days before expiration to improve the 33.7% non-renewal rate.
